

“Writing the Margin”

Reflections from health care aide practicum students and Workbook for future health care aides

*A unique educational initiative for Educational Institutions,
Health Care Aides, and Health Care Aide students.*

“Throughout this collection you will witness the transformation that takes place for these students and how their image of themselves and their clients change. There is a cathartic metamorphosis of emotions that details the change from student to professional. The students encounter challenges and meet them head on, first with fear, then with the understanding that with fear comes the opportunity for growth and perspective.” – Kimberley Stewart, HCA instructor

*“It is our challenges and obstacles which give us layers of depth. Are they fun when they happen? No. But they are what give us strength and make life interesting. Life’s challenges are not supposed to paralyze you. Rather, they are supposed to help you discover who you are. Over these five weeks of my practicum I faced many challenges. I believe that these challenges made me stronger.” –Jignashaben Dave,
HCA student*
